
INVESTMENT POLICY

I. INTRODUCTION

The purpose of this document is to set forth specific investment policy and strategy guidelines for the City of Mansfield in order to achieve the goals of safety, liquidity, yield, and public trust for all investment activity. The City Council of the City of Mansfield shall review its policy and investment strategies annually. This policy serves to satisfy the statutory requirement (specifically the Public Funds Investment Act, Texas Government Code, Chapter 2256, and the “Act”) to define, adopt and review a formal investment strategy and policy.

II. SCOPE

This investment policy applies to all financial assets of the City of Mansfield. These funds are accounted for in the City’s Comprehensive Annual Financial Report (CAFR) and include:

- Governmental Funds
- Proprietary Funds
- Fiduciary Funds

III. INVESTMENT OBJECTIVES & STRATEGIES

The City of Mansfield shall manage and invest the assets of all of its funds with the following objectives. The safety of the principal invested always remains the primary objective. All investments shall be designed and managed in a manner responsive to the public trust and consistent with State and Local law.

A. Suitability of Investments

The City of Mansfield, Texas maintains a commingled pool of operating and non-operating funds for the purpose of obtaining economies of scale in investments and reduced transaction costs while providing separate investment accounting for its operating and non-operating funds. The City utilizes the specific investment strategy considerations designed to address the characteristics of its portfolio:

1. The City’s first investment strategy is to assure that anticipated cash flows are matched with adequate investment liquidity.
2. The second investment strategy is to create a portfolio structure that will experience minimal volatility during economic cycles (high quality paper, short-to-mid-term maturities, laddered or barbell maturity structures).
3. The third investment strategy is to maintain maximum dollar weighted average maturity of 365 days or less and will be calculated using the stated final maturity date of each security.

B. Safety

The primary objective of the City's investment activity in all funds is the preservation of capital in the overall portfolio. Each investment transaction shall be conducted in a manner to avoid capital losses, whether they are from securities default or erosion of market value.

C. Liquidity

The City's investment portfolio for all funds shall be structured such that the City is able to meet all obligations in a timely manner. This shall be achieved by matching investment maturities with forecasted cash flow requirements and by investing in securities with active secondary markets.

D. Yield

The City's cash management portfolio of all funds shall be designed with the objective of regularly exceeding the average rate of return on three-month U.S. Treasury Bills. The investment program shall seek to augment returns above this threshold consistent with risk limitations identified herein and prudent investment policies. The City shall maintain a comprehensive cash management program which includes collection of accounts receivable, vendor payment in accordance with invoice terms, State Statutes, and prudent investment of available cash. Cash management is defined as the process of managing monies in order to insure maximum cash availability and maximum yield on short-term investment of pooled idle cash.

A. Risk and Diversification

The City of Mansfield recognizes that investment risks can result from issuer defaults, market price changes or various technical complications leading to temporary illiquidity. Risk is controlled through portfolio diversification which shall be achieved by the following general guidelines:

1. Risk of issuer default is controlled by limiting investments to those instruments allowed by the Act, which are described herein.
2. Risk of market price changes shall be controlled by avoiding over-concentration of assets in a specific maturity sector, limitation of average maturity of operating funds investments to one year, and avoidance of over-concentration of assets in specific instruments other than U.S. Treasury securities and insured or collateralized certificates of deposit.
3. Risk of illiquidity due to technical complications shall be controlled by the selection of securities dealers as described in Section VII.

F. Marketability

The investment officer shall strive to ensure that the market value of each investment exceeds the book value. The City shall pursue an active versus a passive portfolio management philosophy. That is, securities may be sold before they mature if market conditions present an opportunity for the City to benefit from the trade. The investment officer will routinely monitor the contents of the portfolio, the available markets, and the relative value of competing instruments, and will adjust the portfolio accordingly.

G. Public Trust

All participants in the City's investment process shall seek to act responsibly as custodians of public trust. Investment officials shall avoid any transaction which might impair public confidence in the City's ability to govern effectively.

IV. RESPONSIBILITY AND CONTROL

A. Delegation of Authority and Training

Authority to manage the City's investment program is derived from resolution of the City Council. The Director of Finance is designated as investment officer of the City and is responsible for investment decisions and activities. Unless authorized by law, a person may not deposit, withdraw, transfer or manage in any other manner the funds of the City. The Director of Finance shall establish written procedures for the operation of the investment program, consistent with this investment policy. The investment officer shall attend at least one training session relating to the officer's responsibility under the Act within 12 months after assuming duties. Thereafter, the investment officer shall attend an investment training session not less than once every two years and receive not less than 10 hours of instruction relating to investment responsibilities from an independent source approved by the City Council.

B. Internal Controls

The Director of Finance is responsible for establishing and maintaining an internal control structure designed to ensure that the assets of the entity are protected from loss, theft or misuse. The internal control structure shall be designed to provide reasonable assurance that these objectives are met. The concept of reasonable assurance recognizes that (1) the cost of a control should not exceed the benefits likely to be derived; and (2) the valuation costs and benefits require estimates and judgments by management.

Accordingly, the Director of Finance shall establish a process for annual independent review by an external auditor to assure compliance with policies and procedures. The internal controls shall address the following points:

1. Control of collusion.
2. Separation of transaction authority from accounting and record keeping.

D. Prudence

The standard of prudence to be applied by the investment officer shall be the “prudent investor” rule, which states: “Investments shall be made with judgment and care, under circumstances then prevailing, which persons of prudence, discretion and intelligence exercise in the management of their own affairs, not for speculation, but for investment, considering the probable safety of their capital as well as the probable income to be derived.” In determining whether an investment officer has exercised prudence with respect to an investment decision, the determination shall be made taking into consideration:

1. The investment of all funds, or funds under the City’s control, over which the officer had responsibility rather than a consideration as to the prudence of a single investment.
2. Whether the investment decision was consistent with the written investment policy of the City.

The investment officer, acting in accordance with written procedures and exercising due diligence, shall not be held personally responsible for a specific security’s credit risk or market price changes, providing that these deviations are reported immediately and that appropriate action is taken to control adverse developments.

E. Ethics and Conflicts of Interest

City staff shall disclose to the City Manager any material financial interests in financial institutions that conduct business with the City and they shall further disclose positions that could be related to the performance of the City's portfolio. City staff shall subordinate their personal financial transactions to those of the City, particularly with regard to timing of purchases and sales.

An investment officer of the City who has a personal business relationship with an organization seeking to sell an investment to the City shall file a statement disclosing that personal business interest. An investment officer who is related within the second degree by affinity or consanguinity to an individual seeking to sell an investment to the City shall file a statement disclosing that relationship.
