RE; Fence Material Change

Felix,

Per our email exchange on the South East Perimeter Fence material, we would like to propose an alternate to the Stone Crete Fence originally proposed on our PD application. We have been introduced to a product called SimTek fence material. It is a longer lasting product with a better look than Stone Crete.

We would like to be added to an upcoming council meeting agenda to present this product and ask for a variance to the PD.

Thank you.

John Delin
