

**Propose Storage/Accessory Building and Patio Cover/Carport**

**Address: 380 Holland Ct, Mansfield, Texas 76063**

To Whom it May Concern,

Per the Civil plan we constructed a 23' 8" wide X 26' 6" long X 13' tall building to store construction equipment. We also constructed a patio cover/carport that is 32' wide X 52' 6" long X 16' tall.

Under the current code accessory building we found out that the building can not be taller 12' and not greater than 2% of the size of the lot. Based on the size of our lot (83199.60 SQFT) we would like the 4% SQFT accessory building to be considered. In this case the maximum size would be 3,327.98 SQFT. This building is about 600 SQFT and is 13' high. We are asking 4% SQFT accessory building to be considered because our property has a garage and a shed already build that totals We are requesting the maximum height to be 13' measured form top of slab to the peak of the building. The building is located 78' from the West side property line, and 105' from the eat side of the property line.

Under the current patio cover/carport code we found that our patio cover can not be taller than 12'. We are requesting the maximum height to be 16' from the slab to the peak of the building. This patio cover/carport is located between the house and the garage of our property.

If you have any further questions, please let me know.

Thank you,

Salvador Guardado
