Executive Summary

Project Description

The third phase of Birdsong is proposed to be developed in Mansfield, Texas. The proposed development will consist of 220 single-family lots. The site is located north of Lone Star Road (FM 157) and east of Flying L Lane.

The property will have a full-access connection to Flying L Lane.

TxDOT has prepared plans to realign and widen FM 157 in the project area and that improvement is included in the Full Build analysis.

Trip Generation

The proposed new development is expected to generate 2,148 daily trips, with 40 entering trips and 121 exiting trips in the AM peak hour, and 137 entering and 80 exiting trips in the PM peak hour.

Turn Lanes/Access Management

According to City of Mansfield guidelines, no turn lanes are required at the project access.

Traffic Impacts

Analysis shows that the intersections in the study area are projected to continue to operate acceptably. No improvements are recommended.

I. Introduction

The third phase of Birdsong is proposed to be developed in Mansfield, Texas. The site is located north of Lone Star Road (FM 157) and east of Flying L Lane.

The *Birdsong Development TIA* that includes previous phases of the development was prepared in November 2019. Phase 3 of the Birdsong development is proposed to consist of 220 single-family lots. The property will have a full-access connection to Flying L Lane.

TxDOT has prepared plans to realign and widen FM 157 in the project area and that improvement is included in the Full Build analysis.

The study area included the following intersections:

- Main Street (Business 287) & Flying L Lane
- Lone Star Road (FM 157) & Flying L Lane
- Flying L Lane & Project Access

The study analyzed the following scenarios:

- 2021 Existing Conditions
- Full Build 2022 Conditions

The AM peak hour and PM peak hour were analyzed.

Figure 1 shows the most recent site plan. **Figure 2** shows the project vicinity map.

Flying L Lane - looking south

II. Existing Conditions

A. Existing Roadway Conditions

Table 2.1 presents a summary of the existing roadway conditions in the study area.

Street Name	Functional Class	Typical Section	Posted Speed	AADT
Main St (Bus 287)	Major Arterial	Three-lane with two-way left-turn lane (TWTL)	50 mph	5,518
Lone Star Rd (FM 157)	Major Collector	Two-lane undivided	50 mph	6,987
Flying L Lane	Local Street	Two-lane undivided	30 mph	n/a

FM 157 will be realigned and improved from a two-lane major collector to a four-lane arterial in the vicinity of the site. The schematic plans included in the Appendix shows the proposed realignment and the geometric configuration at Flying L Lane. This improvement is included in the analysis.

The *Mansfield Master Thoroughfare Plan* shows that Flying L Lane will be improved to a three-lane undivided minor collector. It is noted that this improvement will occur after full build out of the proposed development and is not included in the analysis.

B. Existing Intersection Geometry

Main Street (Business 287) & Flying L Lane is unsignalized. Main Street (Business 287) is a three-lane roadway with a center two-way left-turn lane (TWTL).

Lone Star Road (FM 157) & Flying L Lane is an unsignalized T-intersection consisting of a single lane on all approaches. The north leg of this intersection is a driveway for the Texan RV Ranch.

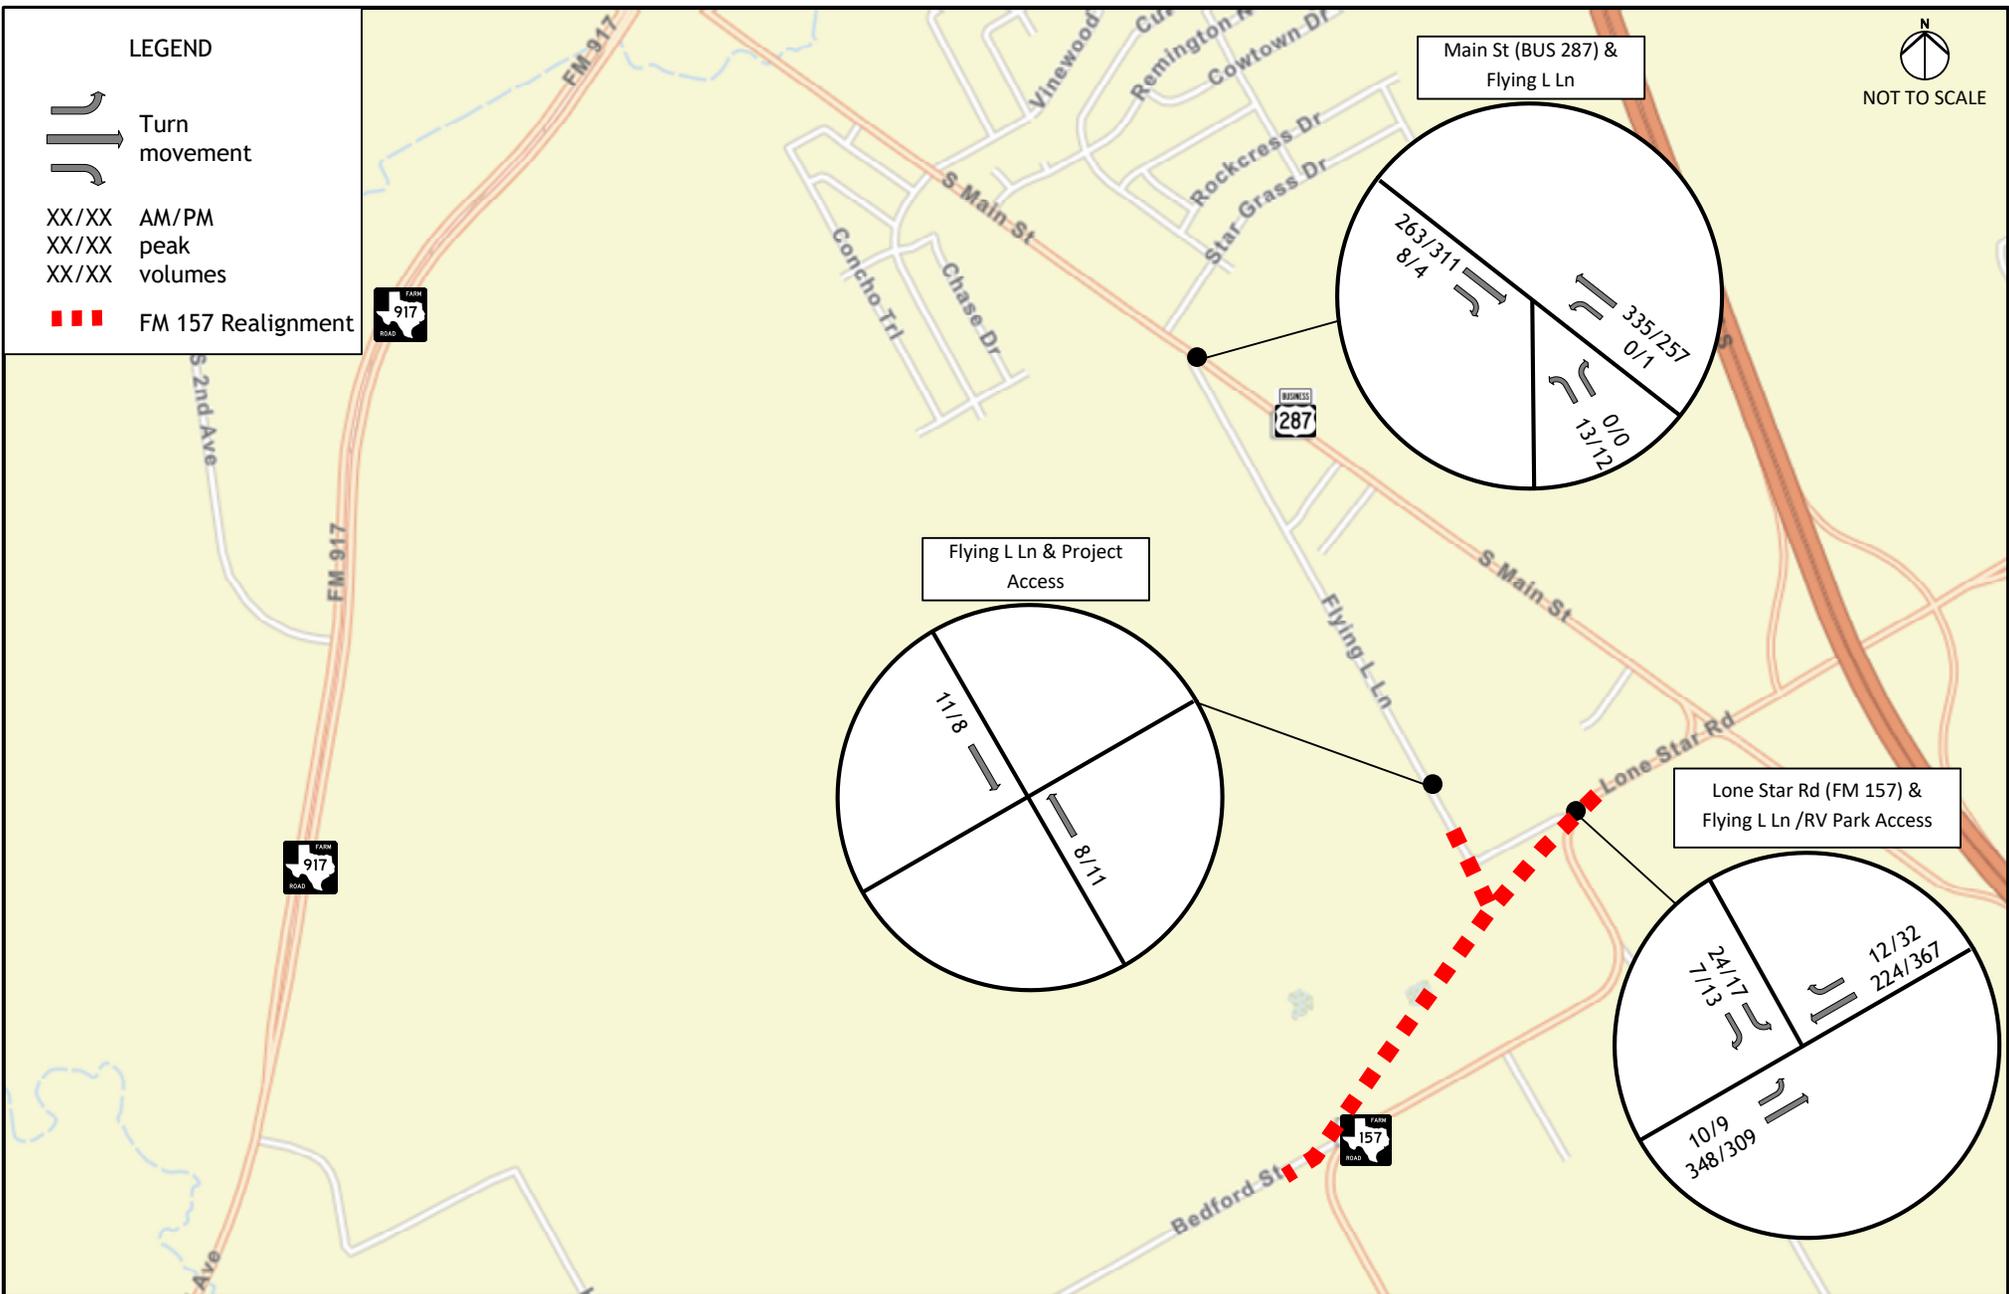

The FM 157 project will relocate the intersection west of its current location. FM 157 will be a four-lane divided roadway with left- and right-turn lanes at the intersection.

The project access is proposed to be a full access driveway to Flying L Lane. It will be located approximately 800 feet north of Lone Star Road (FM 157).

C. Traffic Volumes

Traffic data collection for study area intersections was performed on May 19, 2021. **Figure 3** displays existing traffic volumes. These volumes can be found in the Appendix.

The most recent Average Annual Daily Traffic (AADT) volumes were retrieved from the TxDOT Planning Office website.

Existing Traffic Volumes

Figure 3

Birdsong Phase 3 - Mansfield

Date: 14 June 2021

III. Methodology

A. Base Assumptions

Intersection capacity analysis was conducted using Synchro v10.0. Trip generation was calculated using the 10th edition of the Institute of Transportation Engineers (ITE) *Trip Generation Manual*. Turn lanes on local roadways were examined using the City of Mansfield *Roadway Design Manual*.

B. Background Growth

The average annual background growth rate is calculated using historical AADT volumes. Calculations show that the background growth on Lone Star Road (FM 157) is 2.88% per year. These calculations can be found in the Appendix.

Existing volumes were increased by 3% to estimate background growth for Full Build 2022 conditions.

C. Trip Generation

The development is proposed to consist of 220 single family units.

The *ITE Trip Generation Manual, 10th Edition* was used to estimate the projected trips by this development.

Table 3.1 contains the summary of the land uses and sizes used for trip generation estimates.

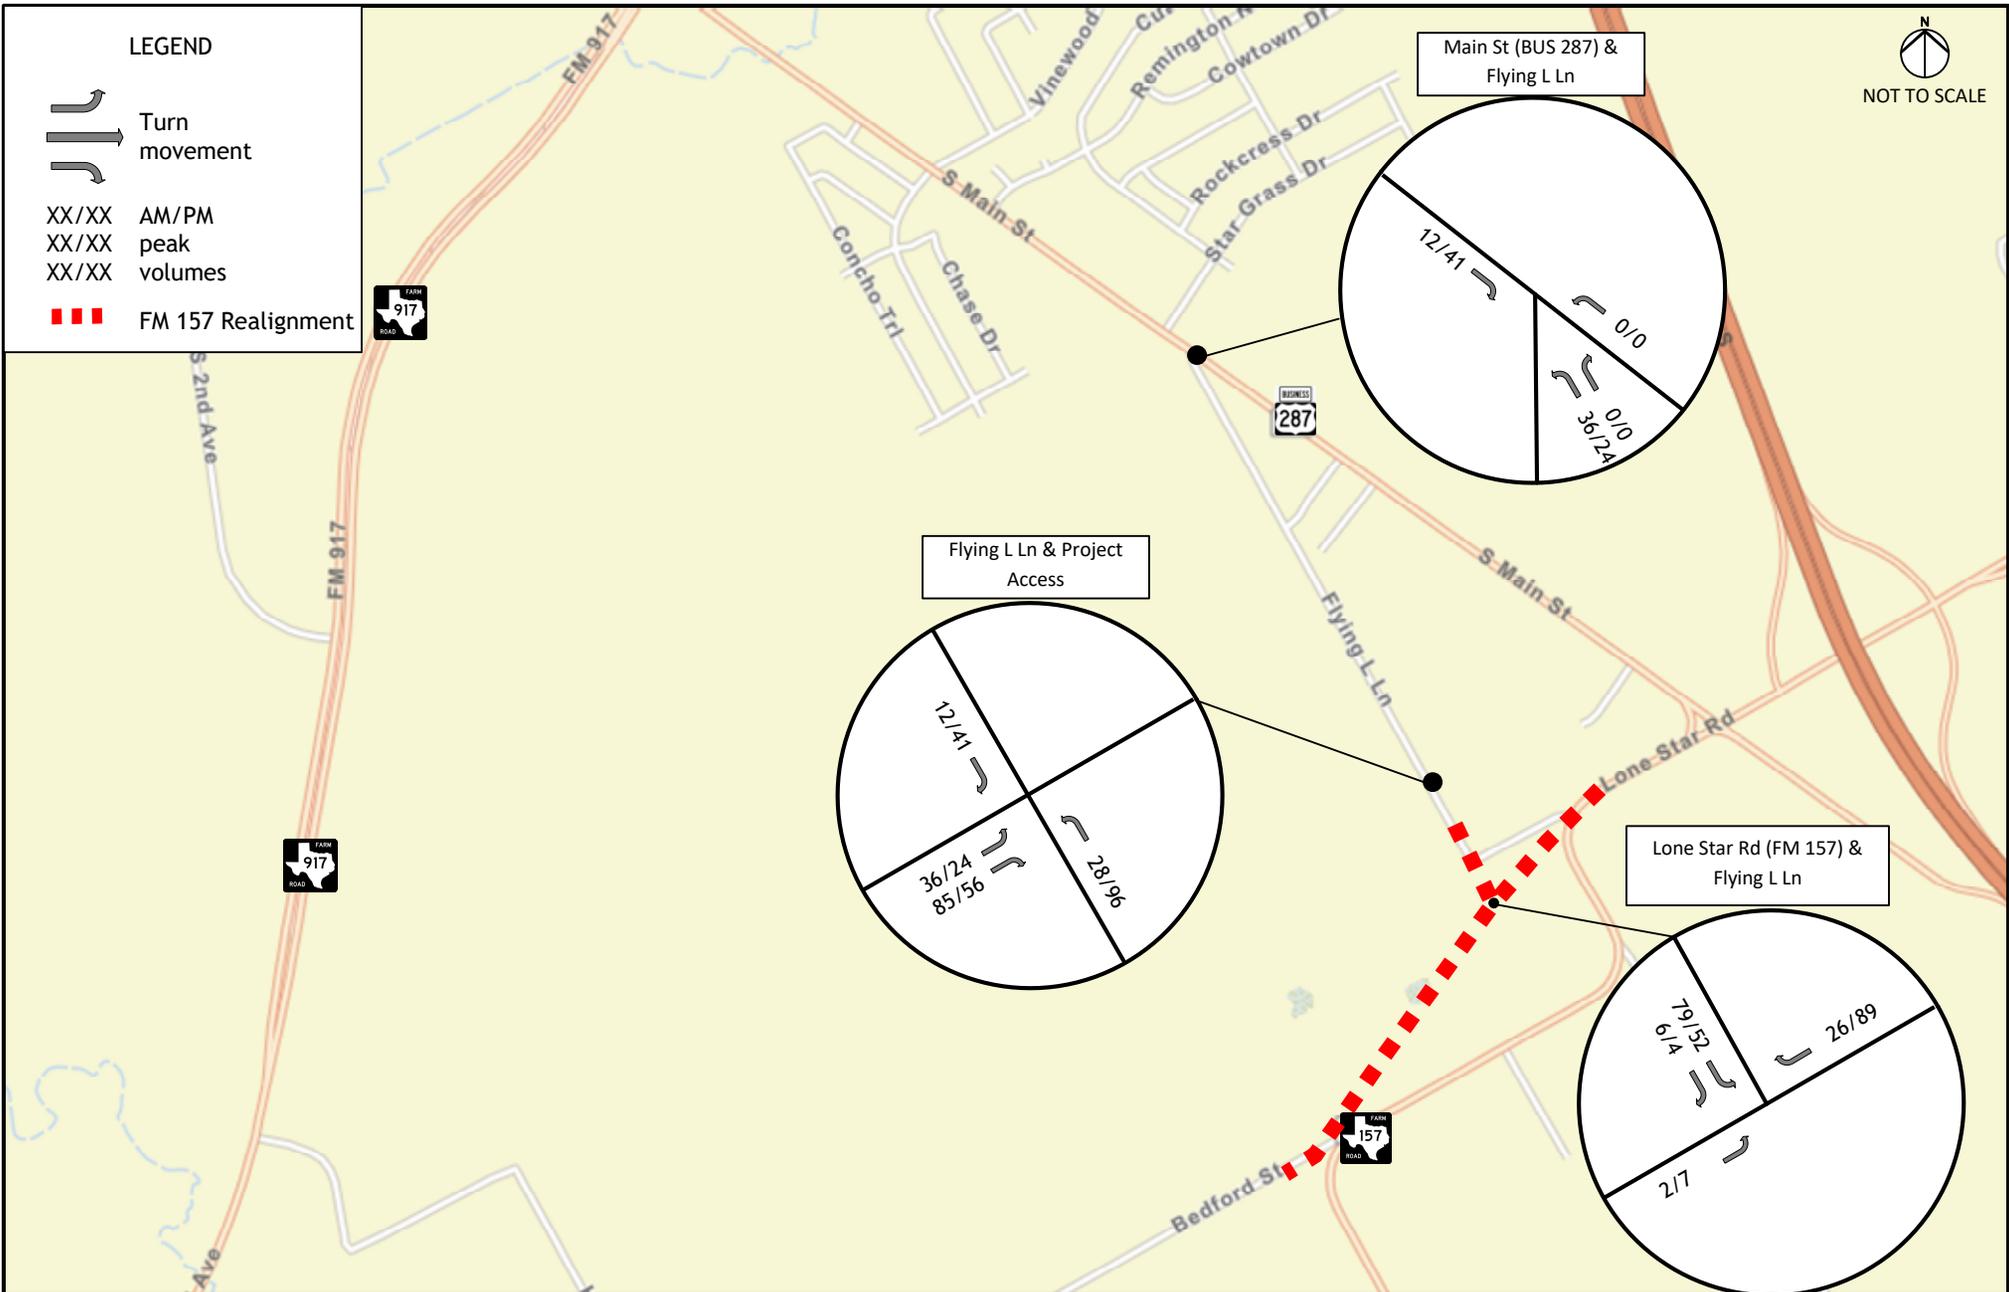

Table 3.1 - ITE Trip Generation								
Average Weekday Driveway Volumes				AM Peak Hour		PM Peak Hour		
Land Use	ITE Code	Size		Daily Trips	Enter	Exit	Enter	Exit
Single-Family Detached Housing	210	220	Dwelling Units	2148	40	121	137	80

D. Trip Distribution

Trips for this proposed development were assigned to the surrounding roadway network based on existing traffic patterns as well as the *Birdsong Development TIA*. The proposed trip distribution for the project is:

- 30% to/from the north on Main Street (Business 287)
- 65% to/from the east on FM 157
- 5% to/from the west on FM 157

The projected site trips are shown in **Figure 4** and Full Build 2022 volumes are shown in **Figure 5**.

IV. Turn Lane/Access Management

A. Right-Turn Lanes

The City of Mansfield *Roadway Design Manual* provides guidelines for auxiliary lanes. The City requires a turn lane where right turn volumes exceed 50 vehicles per hour (vph) on a major street facility.

Table 4.1 shows the Full Build 2022 volumes used in the analysis.

Table 4.1 Right-Turn Lane Analysis					
Driveway	Approach Posted Speed	Hourly Threshold	AM RT volume	PM RT volume	Turn Lane needed?
Flying L Ln & Project Access	SB	50	12	41	No

Analysis shows that based on Full Build 2022 volumes, no right-turn lane from Flying L Lane is required for the project access connection.

B. Left-Turn Lanes

For left-turn lanes, the City requires a turn lane where driveways and public/private streets align with median opening. Based on this requirement, no left-turn lane from Flying L Lane is required for the project access connection.

As earlier noted, the *Mansfield Master Thoroughfare Plan* shows that Flying L Lane will be improved to a three-lane undivided minor collector. The planned improvements may provide opportunity for a center two-way left-turn lane (TWTL) at the proposed project access connection.

C. Intersection Sight Distance

The table below shows required ISD for posted speeds based on AASHTO Greenbook standards.

Speed (mph)	Stopping Sight Distance (ft.)	Design Intersection Sight Distance (ft.)
25	155	280
30	200	335
35	250	390
40	305	445
45	360	500
50	425	555
55	495	610
60	570	665
65	645	720

Source: *A Policy on Geometric Design of Highway and Streets*, 5th Edition, American Association of State Highway and Transportation Officials (AASHTO), 2004.

There are no sight distance obstructions that obscure the view of vehicles at the proposed access driveway.

Flying L Lane - looking north

Flying L Lane - looking south

V. Capacity Analysis

The Transportation Research Board’s Highway Capacity Manual (HCM) utilizes a term “level of service” (LOS) to measure how traffic operates in intersections. There are currently six levels of service ranging from A to F. Level of Service “A” represents the best conditions and Level of Service “F” represents the worst. Synchro software was used to determine the level of service for intersections in the study area. All worksheet reports from the analyses can be found in the Appendix.

Table 5.1 shows the control delay per vehicle associated with LOS A through F for signalized and unsignalized intersections.

Table 5.1 - Highway Capacity Manual Levels of Service and Control Delay			
Signalized Intersection		Unsignalized Intersection	
Level of Service	Control Delay per Vehicle (sec)	Level of Service	Control Delay per Vehicle (sec)
A	≤ 10	A	≤ 10
B	> 10 and ≤ 20	B	> 10 and ≤ 15
C	> 20 and ≤ 35	C	> 15 and ≤ 25
D	> 35 and ≤ 55	D	> 25 and ≤ 35
E	> 55 and ≤ 80	E	> 35 and ≤ 50
F	> 80	F	> 50

A. Main Street (Business 287) & Flying L Lane

Table 5.2 shows the current LOS, control delay, and 95th percentile queue length for existing conditions.

Table 5.2 - Intersection LOS, Delay, and Queue by Movement - 2021 Existing								
Intersection	Approach	Movement	AM			PM		
			LOS	Delay	Queue	LOS	Delay	Queue
Main St (BUS 287) & Flying L Ln	SEB	TH	Free					
		RT	Free					
	NWB	LT	Free					
		TH	Free					
	NB	LT	C	15.3	-	B	13.1	-
		RT						

Table 5.3 shows the expected LOS, control delay, and 95th percentile queue length for Full Build 2022 conditions.

Table 5.3 - Intersection LOS, Delay, and Queue by Movement - 2022 Full Build								
Intersection	Approach	Movement	AM			PM		
			LOS	Delay	Queue	LOS	Delay	Queue
Main St (BUS 287) & Flying L Ln	SEB	TH	Free					
		RT	Free					
	NWB	LT	Free					
		TH	Free					
	NB	LT	C	17.5	18'	B	14.1	8'
		RT						

Analysis shows that acceptable levels of service are maintained with the 2022 Full Build Development Traffic.

Main Street (Business 287) at Flying L Lane

B. Lone Star Road (FM 157) & Flying L Lane

The FM 157 project will relocate the intersection west of its current location. FM 157 will be a four-lane divided roadway with left- and right-turn lanes at the intersection. This planned improvement is included in the Full Build 2022 scenario.

Table 5.4 shows the current LOS, control delay, and 95th percentile queue length for existing conditions.

Table 5.4 - Intersection LOS, Delay, and Queue by Movement - 2021 Existing								
Intersection	Approach	Movement	AM			PM		
			LOS	Delay	Queue	LOS	Delay	Queue
Lone Star Rd (FM 157) & Flying L Ln	EB	LT	Free					
		TH	Free					
	WB	TH	Free					
		RT	Free					
	SB	LT	B	13.8	8'	B	13.2	5'
		RT						

Table 5.5 shows the expected LOS, control delay, and 95th percentile queue length for Full Build 2022 conditions.

Table 5.5 - Intersection LOS, Delay, and Queue by Movement - 2022 Full Build								
Intersection	Approach	Movement	AM			PM		
			LOS	Delay	Queue	LOS	Delay	Queue
Lone Star Rd (FM 157) & Flying L Ln	EB	LT	Free					
		TH	Free					
	WB	TH	Free					
		RT	Free					
	SB	LT	B	13.8	20'	B	13.9	13'
		RT						

Analysis shows that acceptable levels of service are maintained with the 2022 Full Build Development Traffic

C. Flying L Lane & Project Access

The project access is proposed to be a full access driveway to Flying L Lane. It will be located approximately 800 feet north of Lone Star Road (FM 157).

Table 5.6 shows the expected LOS, control delay, and 95th percentile queue length for Full Build 2022 conditions.

Table 5.6 - Intersection LOS, Delay, and Queue by Movement - 2022 Full Build								
Intersection	Approach	Movement	AM			PM		
			LOS	Delay	Queue	LOS	Delay	Queue
Flying L Ln & Project Access	EB	LT	A	9.1	13'	A	9.4	8'
		RT						
	NB	LT	Free					
		TH						
	SB	TH	Free					
		RT						

Analysis shows that the proposed access connection to Flying L Lane is expected to operate acceptably with 2022 Full Build development traffic.

Flying L Lane - looking south

VI. Summary and Conclusion

This study serves as an analysis of the traffic impacts from Phase 3 of the Birdsong development in Mansfield, Texas.

Trip Generation

The proposed new development is expected to generate 2,148 daily trips, with 40 entering trips and 121 exiting trips in the AM peak hour, and 137 entering and 80 exiting trips in the PM peak hour.

Turn Lanes/Access Management

According to City of Mansfield guidelines, no turn lanes are required at the project access.

Traffic Impacts

Analysis shows that the intersections in the study area are projected to continue to operate acceptably. No improvements are recommended.
