RE: Request for Extension  
Woodlands Estates East and West Padsites  
Tarrant County, Texas

Gentlemen:

Eagleridge Energy, LLC, operated by Eagleridge Operating, LLC ("EagleRidge") has previously requested approvals and the City of Mansfield has graciously approved several extensions to use Gas Lift Compressors at the Woodlands Estate sites.

Over the last 7 months we have made numerous proposals to GHA and Summit Midstream suggesting alternatives to our gas lift compressors. We have suggested changing out Summit's main compressors to right size them for our application, or moving all compression to a central location at Summit's mainline that would reduce compression costs and allow Eagleridge to move our compressors into the building currently owned by Summit. Unfortunately all proposals from GHA or Summit have been too costly. The production and revenue from the Woodlands Estates wells will not support the cost associated with the proposals from Summit or GHA and would render the wells uneconomic and non-commercial.

We are still working with Summit on a solution at this time; however, Eagleridge is also considering shutting in all wells until such time as an economically viable alternative is reached. Eagleridge expects to make this decision within the next 30 days and requests a 30 days extension.

Should need any other information or have any questions please call me at 817-946-2873 or my email at [mgrawe@eagleridgeenergy.com](mailto:mgrawe@eagleridgeenergy.com).

Very truly yours,  
EAGLERIDGE OPERATING, LLC

  
Mark L. Grawe
