Surface - Historical Museum

Concept: "Mansfield Legacy"

(Work in Progress) We'll show historic Mansfield on the left and it will fade to modern Mansfield on the right, with our mother and child Acting as the transition point. Left to right, color will also fade from a historical sepia palette to color.

Inspiration

Education

Mention the Arts and Crafts style and most people think of bungalows and mission furniture. But it was more than a period, it was also a mindset — devoted to the honesty of craftsmanship, simplicity in the design and the joys of nature, hearth, and home. Color palettes recreated the earthy shades found in building materials, or the blues and greens of handmade ceramic tiles. Unpainted woodwork and solid-colored, never papered walls let the simple beauty of every object in the home shine through.

Contrast and variety were truly the hallmarks of Victorian style. Period décor brought together multiple rich, intense shades, often from opposite sides of the color wheel. Reds were paired with greens, golds with purples. As time went on, the Victorians began to favor slightly more subdued colors.

How To

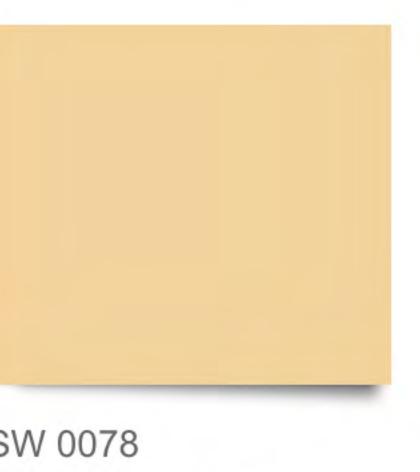

The exuberant post war boom was a mix of styles with mid-century modern and Scandinavian influences making the most impact. Pastels are the norm with pink and turquoise appliances adorning the kitchen and laundry room. Lilac and Chartreuse are very popular.
