### HLC#19-011: Consideration of Possible Changes to the City's Historic Markers

Based on the Commission's preference for a metal marker, Staff ordered a prototype 12 inch, .0125" thick Satin Silver Anodized Aluminum medallion for the Commission's consideration. The image has been laser cut and etched. The manufacturer is Identification Plates, Inc. from Mesquite, Texas. These plates will cost approximately \$175 a piece for an order of four markers.

The current plate is a 12 inch, .153" thick Zinc medallion. The last zinc marker ordered by Staff cost \$792.42 for a single medallion. Staff will have the zinc and aluminum markers at the meeting for comparison.

Staff recommends approval of the aluminum marker.
