On August 17, 2020, staff presented to City Council an opportunity for CARES Act Funds (CRF) to cover a portion of cost to provide public wifi which would serve an immediate need within the community. City Council directed staff to move forward to provide public wifi within the parks and historic downtown. The project was bid publicly and advertised on September 2, September 9, with a bid opening occurring on Thursday, September 17. The only bid submission was provided by BelWave Communications, Inc. In order to utilize CRF for this project, the project must be complete no later than December 30, 2020. CRF will be used to purchase the infrastructure costs in the amount of Two Hundred Forty-Seven Thousand Two Hundred Dollars (\$247,200.00) and any service related expenses incurred on or before December 30, 2020 with General Fund covering service costs following December 30, 2020. Public WiFi will serve an immediate need to the community in a time where connectivity is paramount for residents, students, and the general public.
