Resolution - A Resolution Awarding Twelve-Month Renewable Contracts to the Lowest and Best Bids for the Individual Supply of Eight Different Water Treatment Chemicals for the Bud Ervin Water Treatment Plant.

Consider the attached resolution authorizing a twelve-month with one-year renewable options contract for eight individual water treatment chemicals.

Staff recommends approval.

The invitation to bid was advertised in the Fort Worth Star Telegram, posted on the City of Mansfield website, and bid packets were e-mailed to known suppliers and companies that requested them. Chemicals advertised and recommended for an award with this resolution are citric acid, hydrochloric acid, hydrofluorosilicic acid, hydrogen peroxide, liquid ammonium sulfate, liquid poly aluminum chloride, sodium chloride, and sodium hydroxide.

The TCEQ requires that public water systems meet stringent water quality standards to protect public health. All eight chemicals bid will be utilized at the Bud Ervin Water Treatment Plant in various processes to meet or exceed all water quality standards.
