Ordinance - Third and Final Reading of an Ordinance of the City of Mansfield, Texas, Amending Sections 51.010 Through 51.024, "Industrial Wastewater Regulations" of Chapter 51 of the Code Of Ordinances; Providing that this Ordinance Shall be Cumulative of all Ordinances; Providing a Severability Clause; Providing a Savings Clause; Providing a Penalty Clause; and Providing an Effective Date

Adoption of Ordinance as Written.

Staff Recommends the approval of this ordinance setting industrial contaminate limits for the Mountain Creek discharged portion of our wastewater system.

City Council approved Resolution 3144-15 in August of 2015. This resolution authorized the City of Mansfield to become a contracting party of the Trinity River Authority (TRA) Mountain Creek Regional Wastewater System. Discharge into the Mountain Creek basin was necessary to support the Somerset Development and anticipated growth in the basin.

For TRA to satisfy the requirements of the TCEQ and the EPA as established in the discharge permit for the Mountain Creek Wastewater Treatment Plant, member cities are required to adopt Industrial Wastewater Regulations. These regulations ensure that the plant discharged to is not receiving anything it would be unable to treat. This ordinance sets the local limits for industrial wastewater pollutants that discharge into the TRA Mountain Creek System.

This ordinance combines the local limits of the TRA Central Regional Wastewater System with the local limits of the Mountain Creek Regional Wastewater System. No changes are requested for the allowable discharge limits of the Central Regional System.

Currently, no industrial users operate in the Mountain Creek Basin of our wastewater system.
