Resolution - A Resolution Awarding Contract to the Lowest and Best Bids for the Supply of Granular Activated Carbon Filter Media (GAC) for the Bud Ervin Water Treatment Plant

Consider the attached resolution authorizing a contract for the purchase of GAC Filter Media.

Staff recommends approval of the attached resolution awarding a purchase contract for GAC to Calgon Carbon Corporation for a bid price not to exceed \$1,258,600.00.

The invitation to bid was advertised in the Fort Worth Star-Telegram, posted on the City of Mansfield website, and bid packets were e-mailed to known suppliers and companies that requested them. On September 10<sup>th</sup> at 2:00 P.M., two bids were received. After reviewing the bids, it is staff's belief that Calgon Carbon Corporation provided the lowest and best value bid.

The TCEQ requires that public water systems meet stringent water quality standards to protect public health. GAC will be utilized at the Bud Ervin Water Treatment Plant in the filtration process to meet or exceed all water quality standards.

GAC filter media is used to adsorb organic chemicals and taste and odor-causing compounds during the treatment process. This filter media is a vital piece of the multiple-barrier treatment scheme used at the Bud Ervin Water Treatment Plant.
